## **To whom it may concern:**

My name is Dylan Pratt and I would like to apply for the Software Developer position at BYU. I have a Bachelor's Degree in Software Engineering. For the past two years I have been working for The Church of Jesus Christ of Latter-day Saints as a member of their Java Stack team. This position has provided me with insight into creating software solutions for a wide variety of use cases and collaborating efficiently in a team setting.

I am ready to take my experience in a new direction such as the one offered by BYU. My professional experience includes designing and crafting code for various web functions and then testing the resulting code to meet client needs. I also provided support and consultation to other teams within the organization.

Here are further highlights of my qualifications:

Programming Languages: Java, C#, C++, Python

Experience with React, JavaScript, HTML & CSS

Experience writing REST APIs

Experienced with Spring and Spring Boot

Experience with AWS

Experience with Docker

Familiar with Agile/Scrum methodologies

Experience working on large teams

Technical writing and presentations

I would love to sit down and discuss the Software Developer position in greater detail. I feel I could excel on the team and be a valuable resource to BYU.

**Best Regards,**

**Dylan John Pratt**
