## EXPERIENCE

THE CHURCH OF JESUS CHRIST OF LATTER-DAY SAINTS | Riverton, UT          2018-Present
**Software Engineer | Java Stack Team**
Play a key role in the team tasked with building and supporting enterprise-wide developer platforms for web applications and services. Provide software development expertise & support to various teams. Assist in creating and maintaining APIs / web applications including regular code update, writing tests, adding new features, and assisting in debugging issues.

- Facilitated training to 50+ software engineers of all levels and DevOps leaders by delivering presentations on AWS Far-gate, Junit Testing, and Thymeleaf technologies.
- Authored technical articles and documentation on the company's Java Stack and troubleshooting guides for common issues found in one-on-one support.
- Tracked trends in internal customer requests and feedback to enhance the functionality of applications and improve productivity of engineers.
- Deployed to other teams to assist with project development, and best practices.
- Researched new technologies and report findings to senior engineers.
- Earned an award for writing front-end tests in JavaScript despite no previous development experience.
- Presented each year at the SORT organization-wide technology conference.

BRAD HALL & ASSOCIATES | Idaho Falls, ID          2017
**Information Technology Specialist**
Led the project and the team developing & implementing a system to store historic company documents. Drafted documentation for company-development software and user manuals.

- $100,000 saved for the company in third-party document management fees by designing a process to store 10+ years of documents into the corporate database. Completed the project on time and utilizing only 1% of the allotted budget.

## VOLUNTEER WORK

Spent 24 months living and working in the Philippines. Learned to speak Tagalog fluently while acclimating to a diverse foreign culture and environment. This honed an ability to collaborate with people from varied backgrounds, quickly learn new skillsets, and effectively succeed in any situation.
